RADIOELECTRONICS AND COMMUNICATIONS SYSTEMS

SATELLITE TECHNOLOGIES OF DATA TRANSMISSION

SPECIAL ISSUE

	PAGES	
	RUSSIAN	ENGLISH
Technological features of satellite data transmission systems. V. G. Komarov, A. A. Lipatov, V. F. Oleinik, and K. S. Sunduchkov	3	1
Satellite Systems Of Data Transmission		
The single satellite system of data transmission of Ukraine: plans and implementation. K. S. Sunduchkov, A. A. Makarov, A. A. Negoda, V. G. Komarov, M. Ye. Il'chenko, and A. G. Nezhurenko	14	8
Communication and broadcasting satellite systems on the threshold of the third millennium. V. L. Banket	23	14
Satellite distribution system of information support. I. V. Gorbach and A. A. Makarov	32	20
Microwave integrated television and radio information system. T. N. Narytnik, V. N. Denisenko, M. Ye. Il'chenko, M. V. Gryanik, and S. B. Mal'tsev	40	25
The converter for television reception in the 40 GHz frequency range. K. S. Sunduchkov, I. K. Sunduchkov, I. V. Yakovlev, B. N. Shelkovnikov, A. F. Ryabchuk, V. A. Khitrovskii, and A. M. Kiryusha	50	31
The waveguide quasi-elliptical filter on two-mode resonators with the maximum steepness of the amplitude-frequency response. V. V. Konin	54	34
Systems and Facilities for Remote Sounding of the Earth		
State of the art and prospects for development for remote sounding of the Earth. V. P. Zubko, P. Ya. Is'kov, and Ya. I. Stefanishin	60	39
The airborne multichannel radio-meter complex "Kyi" for remote sounding of the Earth from space. V. M. Chmil', K. S. Sunduchkov, L. S. Nazarenko, V. A. Komyak, and Ya. I. Stefamishin	75	48
A ground-based complex for receiving data of remote sounding of the Earth from satellites. K. S. Sunduchkov, V. A. Kazimirenko, V. G. Komarov, and M. E. Il'chenko	78	50
