RADIOELECTRONICS AND COMMUNICATIONS SYSTEMS

SPECIAL ISSUE

MILITARY RADIOELECTRONIC TECHNOLOGIES

	PAGES	
	RUSSIAN	ENGLISH
Measures against deliberate jamming. V. M. Shlyakhin and Yu. V. Yakovlev.	3	1
Reduction of radar image redundancy based on Kalman filtering. B. V. Lezhankin and S. F. Galiev	13	8
Improvement of accuracy and stability of operation of a tracking direction finder based on biased estimation methods. A. P. Alyoshkin.	22	14
The impact of the supporting structure on the antenna array parameters. M. Yu. Zvezdina	25	16
An optical analog-to-digital converter of interferometric type. A. G. Prygunov, S. A. Chornykh, and A. Yu. Tsvetkov	30	20
A distributed type adaptive matching device for decameter range antennas. V. V. Polevov and I. Yu. Khlopushin	35	23
Importance of the "secondary breakdown energy" parameter in high-power switching transistors. N. G. Vorobyov	37	25
Diffraction of electromagnetic waves on a shutter resistive periodic structure with multilayer periodic inclusions. Ye. L. Kapylov and V. M. Shkil'	43	29
The use of empirical optimization methods in navigational problems under scarce measurement data conditions. T. O. Myslivtsev.	47	32
A method of identification of radioelectronic equipment failures for diagnostic systems with elements of artificial intelligence. A. A. Klemin, S. V. Ignatiev, and A. V. Chernyak	52	36
A recursive adaptive algorithm of multidimensional nonlinear filtering — bi-independent transform of signals. A. A. Shatalov.	57	40
A text-independent system of user voice identification (authentication). L. K. Babenko, O. B. Makarevitch, V. M. Fyodorov, and P. Yu. Yurkov	66	46
Experimental investigation of propagation of radio waves of VHF and microwave range inside buildings. V. B. Avdeyev, D. V. Avdeyeva, A. N. Katrusha, and G. V. Makarov	70	49
Characteristics of a dielectric antenna for the millimeter range of wavelengths. A. P. Krut'ko, V. A. Obolonskii, and B. M. Shevchuk	77	54
