## RADIOELECTRONICS AND COMMUNICATIONS SYSTEMS

	PAGES	
	RUSSIAN	ENGLISH
A microstrip version of class- <i>E</i> microwave amplifier. V. G. Kryzhanovskii and V. A. Printsovskii . . . . .	3	1
A multiuser demodulator with reduced enumeration. V. B. Kreindelin, D. Yu. Pankratov, and A. M. Shloma . . . . .	10	6
A highly sensitive zero modulation radiometer. V. I. Vodotovka, F. M. Repa, and V. P. Kutsenko . . . . .	16	10
Design of band-pass push-pull stages of power amplifiers for UHF transmitters of FM and TV broadcasting. A. A. Titov . . . . .	23	15
Synthesis of asymmetrical filters with regard for dissipative loss. M. Ye. Il'chenko, M. N. Guseva, S. I. Malyk, and V. S. Levitskii . . . . .	32	22
The new digital low-pass filters. V. G. Alekseyev . . . . .	39	28
Investigation of a detector of digital amplitude-modulated signals. Yu. A. Bryukhanov. . . . .	44	31
Nonstructural optimization of devices of scale representation of information with high discreteness. A. V. Bushma, V. G. Krivutsa, and G. A. Sukatch . . . . .	49	35
A band-rejection filter in a partially filled rectangular waveguide. V. N. Pochernyayev. . . . .	57	40
Realization of prescribed AFR of optimal predistortive filter. V. K. Marigodov and Yu. V. Matveyev . . . . .	61	43
Methods for constructing complete families of 36-element perfect binary arrays. I. A. Gepko . . . . .	66	47
Electrodynamic characteristics of the nonresonant system of transverse slots in the wide wall of rectangular waveguide. S. L. Berdnik, V. A. Katritch, V. I. Kiiko, and M. V. Nesterenko . . . . .	73	52

## RADIOELECTRONICS AND COMMUNICATIONS SYSTEMS

	PAGES	
	RUSSIAN	ENGLISH
Simultaneous asynchronous detection-discrimination of signals at the output of multibeam channels with fading. A. P. Trifonov and Yu. S. Radchenko . . . . .	3	1
Method of chaotic mixing for stable reconstruction of images in a radar system with synthetic aperture based on zero manifolds of two-dimensional spectrum of the trajectory signal. P. Yu. Kostenko, V. O. Khrapchinskii, D. V. Minyukov, and T. P. Kostenko . . . . .	13	9
Filtration of synchronization parameters of a signal with pseudorandom phase keying. A. V. Belous. . . . .	26	17
Parametric estimation of the third-order spectra of the mixture of a non-Gaussian signal and Gaussian correlated interference. V. A. Tikhonov and K. V. Netrobenko . . . . .	35	24
The cross-correlation properties of generalized complementary sequences. I. A. Gepko . . . . .	44	30
A regular rule for generation of full classes of optimal systems of DF-signals based on the method of decimation. M. I. Mazurkov and V. S. Dmitrenko . . . . .	50	34
Assessment of impact of the learning sample volume on probabilities of stationary process recognition in the spectral domain. A. V. Yegorov and V. S. Parshin . . . . .	55	37
The Hartley transform of the cross-correlation function of signals. V. L. Seletkov . . . . .	62	42
A method for reducing dimensionality of the space of attributes of recognizable objects. V. N. Bronnikov, V. I. Poddubnyak, and V. Yu. Larin . . . . .	69	48
A fast RLS-algorithm for linearly constrained adaptive filtering of nonstationary signals. V. I. Dzhigan . . . . .	72	51

	PAGES	
	RUSSIAN	ENGLISH
Maximum attainable accuracy of ultra-wideband estimation of velocity. A. P. Trifonov, M. B. Bespalova, and A. V. Kuznetsov . . . . .	3	1
Suboptimal parametric identification of nonlinear stochastic systems. V. I. Mamai, A. V. Sotnikov, and O. G. Shcherban' . . . . .	15	10
Maximum attainable quality of detection and resolution of signals in the detector based on a matched projector. B. F. Bondarenko, G. N. Bondarchuk, and V. Yu. Tymchuk . . . . .	24	16
Implicit digitization at shaping radar images by the method of matched reception in systems with synthetic aperture. P. Yu. Kostenko, V. O. Khrapchinskii, and D. V. Minyukov. . . . .	33	23
Analysis of characteristics of composite ultra-wideband signals with amplitude and positional code modulation. Yu. S. Radchenko and S. V. Sokhnyshev . . . . .	47	32
Synthesis and analysis of detectors of radar signals reflected from a maneuvering target. V. I. Koshelev and V. A. Belokurov . . . . .	56	38
Statistically optimal and neural-network algorithms for estimation of source's coordinates with integration of information in angle-measuring and difference-type range-measuring multi-position radio systems. A. A. Sirota and E. A. Kirsanov . . . . .	63	43
Synthesis of phase-type and matching-filtering devices based on the wave transfer matrix. A. A. Golovkov and A. M. Mal'tsev . . . . .	72	50

	RUSSIAN/ENGLISH	
Maximum attainable accuracy of ultra-wideband estimation of range and velocity at sounding by discontinuous pulses. A. P. Trifonov and M. B. Bespalova. . .	3	1
Efficient determination of phase-keyed signal codes in an acoustooptical demodulator in the presence of external and intrinsic interference. G. S. Nakhmanson and P. L. Man'kov . . . . .	14	9
Experimental determination of accuracy of automatic tracking of low targets by a radar coordinator with monoconical method of direction finding. V. V. Antonets and V. Yu. Tymchuk . . . . .	23	15
Measurement of route and range of an air radiating object by a mobile passive radio direction finder. V. A. Shovgun . . . . .	34	23
Game-theoretic estimation of cipher inaccessibility in information transmission systems. V. K. Marigodov and Yu. V. Matveyev. . . . .	41	28
A method for estimating the power spectral density of an information signal for evaluation of formant intelligibility of speech under lumped interference conditions. S. I. Babusenko and Yu. A. Bondartsov . . . . .	49	34
The peculiarities of decision-making in the information protection tasks. A. A. Bolkunov and A. V. Shlyakhin . . . . .	57	40
Estimation of signal-to-interference ratio at the output of a radio channel with electronic frequency change in the presence of additive-modulating interference. V. I. Vladimirov and N. N. Panasenko . . . . .	63	44
Nonuniform Markovian models of reliability of complex radioelectronic systems. P. B. Abramov. . . . .	71	50
A method for determination of coordinates of a coherent radiation source by scattered radiation. A. Yu. Koziratskii. . . . .	77	54

## RADIOELECTRONICS AND COMMUNICATIONS SYSTEMS

	PAGES	
	RUSSIAN	ENGLISH
Application of a nonlinear method of restoration in combination with sparse antenna arrays in radiometric imaging systems. I. N. Prudius, Ye. I. Klepfer, and L. V. Laz'ko . . . . .	3	1
Maximal frequency of reflection of a decameter wave from the spherically stratified ionosphere. V. P. Pashintsev, M. E. Solchatov, A. Ye. Kondrashin, and A. V. Senokosova. . . . .	12	8
Theory and practice of measurements of antenna radiation characteristics in the near zone by the collimator method. V. I. Dranovskii, V. V. Ovsyanikov, and V. M. Popel' . . . . .	21	15
Investigation of dipole antenna arrays over a grid reflector. V. V. Ovsyanikov, A. S. Avramenko, and R. O. Sinitskii . . . . .	25	19
Algorithmization of problems of excitation of wire structures with rotational symmetry. V. P. Kudin . . . . .	33	25
Decomposition of electromagnetic wave into orthogonally polarized components by an antenna system. L. Ya. Il'nitskii and A. V. Fetsun . . . . .	41	31
Electrodynamic properties of discrete surfaces. Part 2 — symmetric multilayer discrete-plane surfaces. T. A. Tsaliev . . . . .	49	37
The phase relationships and a technique for diminishing measurement errors in multifrequency retransmitting systems. A. F. Velichko, D. A. Velichko, and I. V. Kurbatov. . . . .	57	43
Joint probability densities of envelopes and phases in signal-noise mixture in the reception channel of a surveillance monopulse radar system. A. V. Avlasyonok, S. A. Vashkevitch, and S. N. Derkatch. . . . .	67	50
A super-wideband antenna array for radio direction finding and radiolocation complexes. V. B. Avdeyev, A. V. Ashikhmin, and Yu. G. Pasternak . . . . .	72	54
A ring-shaped bridge in partially filled rectangular waveguides. V. N. Pochernyayev. . . . .	76	57

Power semiconductor pulsers with injection locking for millimeter range of wavelengths. L. V. Kasatkin and V. P. Rukin . . . . .	3	1
Asymmetric double-barrier tunnel junctions in niobium nitride. S. Yu. Larkin and V. Ye. Shaternik . . . . .	20	12
A band-pass microwave filter in high-temperature superconducting films. V. M. Pan, V. F. Tarasov, N. A. Skorik, and S. I. Futymskii . . . . .	25	16
Nonlinear dynamics of electrons in the rotary electromagnetic field. Yu. V. Kirichenko	29	19
Enhancement of speed of fiber-optical systems for information transmission and processing. A. V. Polyakov and S. I. Chubarov . . . . .	36	24
The impact of metal-dielectric layer on wave processes in the electrodynamic system of amplifiers based on Smith-Purcell effect. G. S. Vorob'yov, A. S. Krivets, and A. A. Shmat'ko . . . . .	44	29
A method for improvement of signal-to-background ratio of airborne scintillation gamma-detector. N. N. Krupa, O. N. Partala, and V. A. Tarasov . . . . .	53	35
Numerical simulation of distribution of electric field and particle trajectories in electron sources based on high-voltage glow discharge. I. V. Mel'nik. . . . .	61	41
Simulation of temperature characteristics of silicon sensors operating at low injection levels. P. A. Yaganov . . . . .	72	49
Exact solution to the transcendental equation in the waveguide method of investigation of dielectrics. A. Ye. Dubinov and S. K. Saikov . . . . .	79	54

	PAGES	
	RUSSIAN	ENGLISH
Calculation of scalar product of signals based on Hartley's transform. V. L. Seletkov . . . . .	3	1
Approximation of amplitude-frequency responses of minimum-phase recursive digital band-pass filters. I. I. Trifonov and K. S. Skiba . . . . .	11	7
Design of analog networks in the control theory formulation. Part 1: The theory. A. M. Zemliak . . . . .	18	12
Amplification of phase-keyed signals by devices in IMPATT-diodes. L. V. Kasatkin . . . . .	30	20
Compensation of additive fluctuating interference in the information processing systems. A. S. Makarenko and Ye. A. Makarenko . . . . .	36	25
An algorithm for parametric optimization of electronic networks based on numerical integration methods. A. V. Ladogubets . . . . .	40	28
A method for determination of energy center of a solitary pulse. V. G. Andreyev and O. V. Pal'chik . . . . .	47	33
Estimation of signal parameters at two-stage processing. Yu. S. Radchenko . . . . .	56	39
Impact of heat treatment on resistivity of ohmic contacts in GaAs <i>p</i> -type monocrystals. Ye. P. Markovskii . . . . .	63	44
Synthesis of transformer of resistance for matching a decimetric-wave antenna to transmitter output stage. A. A. Titov . . . . .	69	48
Errors in the measurer of phase difference of microwave signals. K. N. Gura, M. F. Mkheyian, and F. M. Repa . . . . .	75	52
